

Mobile Financial Accounting

How does "Mobile Financial Accounting" work?

- One of our employees pays a visit to you at the desired date at your company.
- Financial accounting is generated on a notebook computer with DATEV pro.
- The bookkeeping processing is performed back in our office.
- If desired, the business evaluation (BWA) can be sent by post or handed over to you in person at the next appointment.
- Any questions on the BWA may be discussed directly with one of our local employees.
- Regardless of set accounting dates, we are always at your disposal for any additional consultations.
- Of course we can also take over preparation of your financial statements and your tax accounts.

Advantages to you

- Time and cost savings through the elimination of travel
- Permanent access to all documents within your company
- Immediate on site problem solving
- Avoids the need for constant enquiries and phonecalls
