

Company online

Company Online is an accounting platform which creates individual possibilities to deal between law firms and clients. The key is digital document exchange. Clients scan documents and transfer them to the DATEV data center. The digitized documents and documents for businesses and law firms are available on a central database. Seemann, Kalker & Partner accepts relevant account keeping information by means of automatic license recognition directly into the accounting records. They provide companies with a system for the entire commercial process and a solution for the personnel department.

Company online meets the demands of cooperation:

- Settlement of payments with pre-filled payment mediums from a digital document and automated control of the account statements as well as release of pay payments
- GoB-compliant cash book
- Control of incoming and outgoing invoice ledger
- Entry of personnel master data and movement data for payroll accounting
- Exchange and central filing of documents for the creation of wage and salary documents via DATEV Digital personal files
- Optionally expandable for proposals and billing

Additionally, Seemann, Kalker & Partner also provide evaluations in the areas of FIBU, OPOS, cost accounting and pay via Company Online. Therefore, clients always have up-to-date evaluations for managing their company.
